Make Amazing Happen!

An outstanding opportunity to join a Global Leader awaits a passionate and goal oriented Graduate. We are seeking enthusiastic, customer focussed graduates to support our business deliver excellence to our clients. You will have the opportunity to work on signature projects whilst continuing to grow and develop your knowledge in your chosen field.

Our team is seeking an enthusiastic graduate who is interested in developing their skills. We are looking for an agile individual who loves problem solving and has an excellent approach to client/customer service. As part of an international, multi-disciplinary organisation, you will have the opportunity to work on a range of projects.

Your development

Our Growing Professional Skills (GPS) graduate program is designed to help you bridge the gap between formal education and the workplace. The GPS program is spread across three years and comprises a range of core competencies and recommended training. As part of the program, we work with you to develop a plan, outlining your goals and required actions, and provide training that will be reviewed every six months.

Along with local site visits, technical seminars, and internal and external training, AECOM connects you with local and global teams to source knowledge and experience, which creates an invaluable network that helps you learn, grow, and develop your professional skills.

As an added incentive, your involvement in the GPS program is fully endorsed for those seeking

Professional accreditation. If you decide to do additional study, we will help you examine your options and identify particular fields of specialisation to support your career.

Key Responsibilities

- Assist team and project managers by developing good working relationships with clients during the delivery of projects
- Develop good relations with your team and other teams across multiple business areas and locations
- Undertake internal training and work towards accreditation relevant to your profession

Preferred Qualifications

- Tertiary qualification in Mechanical Engineering/Fire Engineering/Chemical Engineering or related
- 0-2 years' experience
- Excellent written and verbal communication skills
- Demonstrated time management and organisational skills
- A strong sense of commitment, a willingness to learn, and a desire to work in a dynamic deadline drive environment
- Quality and productivity in execution of duties and responsibilities as outlined above
- Ability to work away on site and interstate occasionally
