

ARUP

Join a team of world class fire engineers. Arup is a multi-disciplinary consultancy which includes one of Australia's largest fire engineering teams.

We design fire safety strategies for buildings and infrastructure, from stadiums to rail networks, and everything in between.

You will be part of, supported by and learn from our team of global experts in all aspects of fire engineering; from structural fire engineering, smoke modelling to human behaviour, there is something for everyone.

If you are interested in undertaking a graduate program in fire engineering within Australia, please contact:

Alex Knight
