JOB ROLE

# Graduate Fire Safety Engineer – Sydney

## Who do we need?

CORE Engineering Group are searching for a driven and dedicated fire safety engineer to add a new dimension to our Sydney team. A masters degree specialising in fire engineering is a major advantage, however we also invite engineers with an undergraduate degree and a keen interest in pursuing a career in fire engineering to apply.

## Will our ethos suit you?

At CORE, we are committed to pushing the boundaries of our knowledge, and that of the industry in order to achieve the best possible outcome for our clients. We have a fantastic group of enthusiastic fire engineers, regularly involved in lively debate and brainstorm sessions. An alternative and fresh viewpoint to challenge the status quo is encouraged!

Our dynamic team is set up to support you in achieving your own personal goals, with a tailored graduate development pathway and one on one mentoring to facilitate promotion internally and to achieve chartership within 5 years.

## What is the role and what are the responsibilities?

If you are the successful candidate, you will work on some of the most iconic projects in Sydney, including Crown Resort Sydney, The Ribbon in Darling Harbour and The Sandstone Precinct on Bridge Street, as well as a variety of projects across industrial, commercial, retail, residential, aged-care and health-care sectors. You will gain technical experience and expertise over the full range of our portfolio, producing fire engineering assessments, and undertaking computational modelling. In addition, you will rapidly develop your consulting skills through communicating directly with the project teams to achieve successful results.

## Get in touch

If you are up to the challenge, or would like more information feel free to call Graham for a chat on 02 9299 6605 or email your CV to [graham@coreengineering.com.au](mailto:graham@coreengineering.com.au)
